Art Unit: 2157

Response to Amendment

1. The Amendment filed on 08/29/2003 has been entered and made of record.

2. This application has been reviewed. Claims 1-29 are pending. The rejection cited stated below.

3. Applicant's arguments with respect to claims 1-29 have been considered but are not persuasive for the following reasons:

In response to applicant's argument that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies (i.e., **single** statistically-allocated thread) are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

In response to applicant's argument that in Guedalia, the dynamically-allocated threads are not simulated thread. Examiner, respectfully disagrees and would like to point out another section of the reference where it shows the threads are simulated threads (see col. 3, lines 61 to col. 3, line 7).

Claim Rejections - 35 USC § 102

4. The following is a quotation of the 35 U.S.C. 102 that form the basis for the rejections under this section made in this action:

A person shall be entitled to a patent unless--

Art Unit: 2157

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371© of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

5. Claims 1-29 are rejected under 35 U.S.C. 102(e) as being anticipated by Guedalia et al., U.S. Patent No. 6,535,878.

As per claims 1, and 7, Guedalia et al., disclose a system for implementing multiple thread pools including:

simulating plurality of dynamically allocated thread (see col. 3, line 61 to col. 4, line 7, and col. 21, lines 5-65).

maintaining state information (wait state or active state) of the dynamically allocated thread (see col. 11, lines 1-37).

In considering claims 2 and 8, Guedalia et al., disclose a system, further comprising maintaining a routine capable of waite state or idle of being re-entered (see col. 19, lines 40-60).

Art Unit: 2157

In considering claims 3 and 9. Generating set of entry points in response of or more programming macros is inherent to the system of Guedalia et al.,.

In considering claims 4-6, 10-11, 16-17, and 22-23, Guedalia et al., disclose maintaining high concurrence among threads without maintaining a substantial amount of state information of the simulated threads (see col. 10, line 59 to col. 11, line 40 and col. 19, line 50 to col. 20, line 41).

In considering claims 12, and 18, Guedalia et al., disclose a system, wherein the plurality of dynamically- allocated thread are simulated using statistically allocated threads under an operating system (see col. 3, line 61 to col. 4, line 7, and col. 21, lines 5-65).

Claims 13 and 15, and 19 and 21, Guedalia et al., discloses a system further comprising scheduler (watchdog monitor or a management software) for managing the dynamically allocated threads (see col. 13-67).

In considering claims 14, 20, 25, and 28, Guedalia et al., discloses a system wherein the threads blocks are stored in a queue (see col. 13-67).

In considering claims 24, 26, 27, and 29. The claims include features discussed above with respect to claim 1, further reciting utilizing an scheduler for scheduling threads (watchdog

Page 5

Art Unit: 2157

monitor or a management software) for managing the dynamically allocated threads (see col. 13-67).

6. THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

CONCLUSION

- 7. The prior art made of record and relied upon is considered pertinent to the applicants disclosure.
- 8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Abdullahi E. Salad whose telephone number is (703) 308-8441. The examiner can normally be reached on Monday to Friday from 8:30 AM to 5:00 PM.
